DEVELOPING FOR THE FUTURE

AUR31816 Certificate III in Heavy Commercial Trailer Technology

VTECH

DEVELOPING FOR THE FUTURE

AUR31816 Certificate III in Heavy Commercial Trailer Technology

This is a national recognised qualification for the repairing and servicing of Heavy Vehicle Trailers in the Road Transport Industry. This will enable the Industry to have national qualified technicians working on Heavy Vehicle Trailers. The qualification would be suitable for new entrants and current staff working in the Road Transport Industry. VTECH already offers accredited training in all the units required for this intended new qualification.

Currently at VTECH we can offer the AUR31816 Certificate III in Heavy Commercial -Trailer Technology per the AUR VER 3 Automotive Industry Training package Retail Service and Repair incorporating units specific to Heavy Vehicle Trailer Repairs.

Information

- We found from Industry feedback there was a need for a course specializing in repairing trailers for the Heavy Road Transport Industry.
- This is a good way to learn about the Transport Industry and the vehicles in it prior to them moving through to operational and driving type roles . It is also a chance for staff working in the Road Transport Industry to formalize their knowledge with accredited training.
- Can be used as an entry level to the Industry.
- Participants can learn valuable skills before moving onto Heavy Vehicle repairs, driving or operational roles.
- This qualification is ideal for School Based Apprenticeships.
- Upskilling existing staff to a Qualification

VTECH can design training to your needs

Vocational Australian Apprenticeships

Australian Apprenticeships are available to people of all ages giving Industry the freedom to choose employees according to their needs. Automotive Australian Apprenticeships & Transport Traineeships are available in many qualifications.

Government Incentives

Please check out the following website:
www.australianapprenticeships.gov.au
for Government Incentives for apprentices.

Workplace RPL & Assessing

Existing experienced staff already in the Transport Industry can go through the RPL process to formalise their training. VTECH offers Recognition of Prior Learning (RPL) services. This is most likely carried out in the workplace and entails the applicant to produce sufficient evidence (practically and theoretically) to meet the full recognition of the competencies being assessed.
